Discussion: Consider: What is it? What is your interpretation rationale? How does this context relate to surrounding contexts? Have there been post-depositional processes? Are there special characteristics of this context? How was this context formed? What do you think is the origin of this context? (Additional sketches may be drawn here if required).

C803 is cut of pit C802, possibly relating to other cuts as well, but here the ~~for~~ surrounding area needs to be explored further in order to explore that possibility. Some holes, possibly animal, ~~cut~~ on the natural soil around cut, surround it, creating a semi-circular shape.
