<p>Discussion: Consider: What is it? What is your interpretation rationale? How does this context relate to surrounding contexts? Have there been post-depositional processes? Are there special characteristics of this context? How was this context formed? What do you think is the origin of this context?</p> <p>most of pottery is Late Neolithic Phase II and maybe soak in water for a long time. little quantity of late Neolithic I Concretion at the bottom side of pottery → soak in water. ○ Over burned or water? → surface of pottery. pit or rejection dump down. ○ dump or pit of ceramic.</p> 	
Time Period (include rationale): late Neolithic II	Phase Number: 2
