Discussion: Consider: What is it? What is your interpretation rationale? How does this context relate to surrounding contexts? Have there been post-depositional processes? Are there special characteristics of this context? How was this context formed? What do you think is the origin of this context?
This context was discovered after the removal of C217. It is not excavated or explored yet. The color of it is darker than C217, but still light brown, with whitish sand inclusions, but less than C217. Slightly more compact but still easy to remove. Possibly natural, untouched soil. Absence of findings so far.
