Discussion: Consider: What is it? What is your interpretation rationale? How does this context relate to surrounding contexts? Have there been post-depositional processes? Are there special characteristics of this context? How was this context formed? What do you think is the origin of this context?

C628 is a posthole at the north east corner of the sortage, which is supposed to be a round wood stick to strengthen the wall (C601), (18.07.23)

After excavated, it is a layer which lots of charcoal. the color of soil is gray and ashey, same as C625, and connect with C625 ~ 627. at the bottom of layer, it came up lot of charcoal, and the soil become more brownish.
