▲ Small Finds: (list, noting: Bag #, Type, Material) 		
◆ Samples: (list, noting: Sample #, Type, Volume) #4: Soil Sample (clay from the wall)		
Deposit Sieved: YES / NO	% Sieved:	
Discussion: Consider: What is it? What is your interpretation rationale? How does this context relate to surrounding contexts? Have there been post-depositional processes? Are there special characteristics of this context? How was this context formed? What do you think is the origin of this context? Wall made of reddish clay material. Only a deflated foundation base is visible. The width is about 2,50 m and visible length 0,96m, however undetermined, since it could be extending more to the southern or northern side of trench. The already visible part and the possibility of expansion in the north or south fit the magnetometry.
