Discussion: Consider: What is it? What is your interpretation rationale? How does this context relate to surrounding contexts? Have there been post-depositional processes? Are there special characteristics of this context? How was this context formed? What do you think is the origin of this context?

C240 is an area of concentrated fallen CBM in the center of the trench. CBM was in large pieces* After removing them a dark area was revealed, probably due to the burnt CBM. The same dark surface extends to the dark area on the eastern side of the bulk that the excavating machine revealed. We suggested to maybe extend the C240 to that area.

*and some of them were burnt
