Samples: (list, noting: Sample #, Type, Volume)

Deposit Sieved: YES/NO

% Sieved: 100%

Discussion: Consider: What is it? What is your interpretation rationale? How does this context relate to surrounding contexts? Have there been post-depositional processes? Are there special characteristics of this context? How was this context formed? What do you think is the origin of this context?

At first, we thought C705 was area inside the house because it was surrounded by clay structure. However, after the excavation, we realized C705 was in fact the residue of C702.

Since it was a very thin deposit, around 3~4 cm, post-ex model of C705 was not taken.

Time Period (include rationale):

modern period
