◇ Samples: (list, noting: Sample #, Type, Volume)

Deposit Sieved: YES /NO

% Sieved: 40%

Discussion: Consider: What is it? What is your interpretation rationale? How does this context relate to surrounding contexts? Have there been post-depositional processes? Are there special characteristics of this context? How was this context formed? What do you think is the origin of this context?

TP The C211 is the fill of C212, which is the bottom of modern disturb deposit. The nature of C211 is the same as C205, but with more carbon inclusions. Modern material/s were found in the context.

Time Period (include rationale):

Modern
