**Discussion:** Consider: What is it? What is your interpretation rationale? How does this context relate to surrounding contexts? Have there been post-depositional processes? Are there special characteristics of this context? How was this context formed? What do you think is the origin of this context?

C245 is a black ashy area with lots of CBM. Probably a part of architecture structure. It's on the house floor we defined. Unexcavated this year.
