<b>△ Small Finds:</b> (list, noting: Bag #, Type, Material)		
<b>◇ Samples:</b> (list, noting: Sample #, Type, Volume) Flotation #1		
Deposit Sieved: YES/NO	% Sieved: 100%	
<b>Discussion:</b> Consider: What is it? What is your interpretation rationale? How does this context relate to surrounding contexts? Have there been post-depositional processes? Are there special characteristics of this context? How was this context formed? What do you think is the origin of this context? C639 is at southwest corner of northern sandage. it was below C636 and truncated C644 which is natural soil. It could be associated with the process of the wall C607, which is a process prepare for building wall. People first dig a small pit and smooth the bottom of pit, then shove fill in some building material to the wall. the cut is extend into the bottom of wall (C607) seem to be created before it.
