Discussion: Consider: What is it? What is your interpretation rationale? How does this context relate to surrounding contexts? Have there been post-depositional processes? Are there special characteristics of this context? How was this context formed? What do you think is the origin of this context?

C706 was a mixture of compacted clay deposit and soft soil, which was common in this area. The former was the collapsed clay structure on top of each other, the latter was caused by animal activity.
